

Overview

HP StorageWorks MSL5026SL Tape Library (Graphite)

HP StorageWorks MSL5026SL Tape Library

At A Glance

- The HP StorageWorks MSL5026SL Tape Library starts HP's mid-range family of tape automation products for the mainstream automation segment. It is the first to offer high availability features in this segment with hot plug drives.
- It offers 5.72 TB (2:1 compression) of storage, providing the highest capacity in its class in a compact 5U form factor, in tabletop or rackmount configurations.
- It is scalable up to seven units in a rackmount configuration to provide a maximum of 40.04 TB (2:1 compression) of data backup capacity

Product Highlights

HP StorageWorks MSL5026SL Tape Library (graphite) Models

The HP StorageWorks MSL5026SL Tape Library comes with 26 media slots (including one mail slot) and one or two HP StorageWorks SDLT 110/220 Tape Drives (number of drives determined by SKU chosen).

MSL5026SL, 0 DRV, RM Graphite Library	293472-B21
MSL5026SL, 1 DRV, SDLT 110/220, TT Graphite Library	302511-B21
MSL5026SL, 2 DRV, SDLT 110/220, TT Graphite Library	302511-B22
MSL5026SL, 1 DRV, SDLT 110/220, RM Graphite Library	302512-B21
MSL5026SL, 2 DRV, SDLT 110/220, RM Graphite Library	302512-B22
MSL5000 Field Upgrade SDLT 110/220 Drive, LVD	231823-B22

Each library installation will require, (1) library system, (1) geographically specific power cord, (1) SCSI cable for each SDLT drive pair, and up to 26 pieces of SDLT media with Bar Code Labels for each MSL5026SL. Multiple configurations will require additional pass-through kits.

The minimum orderable configuration consists of a single library system (for instances where customers already have the necessary SCSI cables, power cord, and media).

Installation services may also be ordered for customers who want to have a certified Hewlett-Packard engineer perform an onsite library installation.

MSL5026SL Library Customer benefits

- High availability feature for minimum downtime
- Reliable, cost effective backup, restoration and archival solution that fits a growing companies storage needs
- High storage capacity to backup large amounts of data in a small backup window
- Easy to operate which equates to lower cost of ownership
- Compressed form factor only taking 5U of rack space with a single module
- Removable magazines for off-site backup storage
- Multi-unit scalability for future growth and investment protection
- Compatible with a wide variety of operating systems, software applications, and server platforms

Key Features

- Hot plug drives for online repair and capacity expansion, without interrupting library operations for minimum downtime
- One or two SDLT 110/220 drives, with a throughput of 11 MB/s (native) per drive for a backup performance of up to 79.2 GB/hr for a single unit
- Ultra2 LVD SCSI interface
- Twenty-six data slots for a native capacity of 2.86 TB, giving the highest density in a 5U form factor in the mainstream segment (including one mail slot for quick load/unload and removable magazine)
- Two cPCI slots for added functionality through add-on cards in future
- GUI based touch screen panel for easy library operation
- Available as either a rackmount or tabletop configuration
- Multi-unit modular scalability, up to eight units, for future growth and investment protection

High Availability and Hot Pluggable Drives

As data becomes more mission critical, and downtime becomes more costly, customers are requiring high availability features on tape automation devices. The MSL5026SL uses hot pluggable SDLT drive carriers, allowing drive replacement without interrupting backup and restore functions. These hot pluggable drive trays allow for easy scalability of performance, as well as provide an easy upgrade path towards future SDLT drive technologies.

NOTE: The MSL5026SL accepts only library ready drives specifically modified for use in the MSL5026SL library.

Product Highlights

-
- Proven Reliability** Using SDLT tape drives, and proven library robotics with a rating of 2,000,000 robotic load/unload cycles, the MSL5026SL provides the necessary high reliability for today's demanding environment.
-
- DLT/SDLT Technology** Digital Linear Tape uses a proven linear recording technology, a highly accurate tape guide system, and a read after write correction system to provide high-capacity, high reliability data backup and restoration. DLT has fast become the industry-standard secondary storage tape format for departmental and enterprise backup. The new generations of SDLT tape drives, in addition to enhanced capacity and backup performance, provide several new features such as Laser Guided Magnetic Recording (LGMR) technology, Pivoting Optical Servo (POS), Magneto-Resistive Cluster Heads (MRC), Partial Response Maximum Likelihood (PRML) channel technology and backward-read compatibility with earlier generation of DLT drives, to be able to read media written in DLT IV format.
-
- Manageability** The HP StorageWorks MSL5026SL library configurations are fully supported through Hewlett-Packard Insight Manager 7.0, providing information to administrators for robotic status, tape status changes and fault status. Hewlett-Packard TSMC (tape storage management console) software provides diagnostics and easy firmware upgrade capabilities.
-
- Investment Protection** The HP StorageWorks MSL5026SL can be upgraded to Ultrium tape drives simply by removing the current tape drives and magazines and replacing them with the desired Ultrium drive. The MSL5026SL can also be upgraded to SDLT 320 tape drives by simply removing the current tape drives and replacing them with SDLT 320 tape drives.
-
- Multi-unit Modular Scalability** The HP StorageWorks MSL5026SL has the capability for multi-unit scalability; up to eight libraries can be scaled together in a virtual library. The first two modules are linked using pass-through mechanism, which has the elevator mechanism for tape movement. Additions of subsequent modules require the pass-through extender (one for each additional module).
-
- ISV/OS Support** For the most up-to-date ISV & OS support please consult the Enterprise Backup Solutions Compatibility Matrix at <http://www.hp.com/go/ebs>.
-
- Server Support** **NOTE:** Some servers may no longer be available for purchase.

Media Partitioning Support

Media partitioning is the capability to create logical pools or partitions in a tape library. The MSL Tape Libraries media partitioning capability supports multiple drives types within a single library or in a multi-unit stack. For current software supported, please consult the Enterprise Backup Solutions Compatibility Matrix at <http://www.hp.com/go/ebs>.

Service and Support, HP Care Pack and Warranty Information

HP Installation and HP Care Pack Information Hewlett-Packard provides a one year, limited warranty, together with phone support for the duration of the warranty.
In order to provide ease of installation, maximize uptime and ROI, Hewlett Packard provides a range of upgradeable service options.

Description	Band For MSL5026 1 or 2 drive library	Band For Drive upgrade kits	Installation Band	Part Number
Initial Tape Library Installation	463	N/A	5DR	HA113A1
Initial Tape Library Implementation Into SAN	463	N/A	5DR	HA114A1
Subsequent Tape Installation	N/A	8G5	5DU	HA113A1
HW, "3-year", "next-day", "on-site"	463	8G5	N/A	HA101A3
HW, "3-year", "4-hour", "13 x 5", "on-site"	463	8G5	N/A	HA103A3
HW, "3-year", "4-hour", "24 x 7", "on-site"	463	8G5	N/A	HA104A3
Support plus, "3-year"*	463	8G5	N/A	HA109A3
Support plus 24, "3-year"*	463	8G5	N/A	HA110A3

Hewlett Packard also offers 1-year options for the services quoted above.

* [Support Plus covers Hardware support only.](#)

Due to the complexities involved with the initial installation of an enterprise Library into a SAN environment, Hewlett Packard recommends that customers take advantage of the SAN Implementation Service (HA114A1). This service covers pre-installation preparation activities, installation and configuration of the library and router, configuration of hosts and switches, verification testing and customer orientation.

In order to maximize ROI and product uptime, and minimize the cost of ownership, Hewlett-Packard recommends the 3-year, 24 x 7 service options. These offerings will ensure that any product issue can be tackled when they occur (most back up issues will occur outside standard business hours) and that the service coverage regarding period, covers the minimum expected life of the host system.

Auto Power On Auto-power-on is a feature that allows the library to reboot in the event of a power failure without operator intervention. This feature must be installed by an authorized service technician.
